Rules on letting this property Properties can be rented if they have an energy rating from A to E.

If the property is rated F or G, it cannot be let, unless an exemption has been

registered. You can read guidance for landlords on the regulations and exemptions.

Breakdown of property's energy

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is

When the description says "assumed", it means that the feature could not be

Average thermal transmittance 0.24

Average thermal transmittance 0.11

inspected and an assumption has been made based on the property's age and type.

W/m²K

Each feature is assessed as one of the following:

Description Feature

very good (most efficient)

very poor (least efficient)

- Walls

Roof

W/m²K Floor Average thermal transmittance 0.12

W/m²K good High performance glazing Windows Very good

Main heating	Boiler and radiators, mains gas	Good	
Main heating control	Time and temperature zone control	Very good	
Hot water	From main system	Good	
Lighting	Low energy lighting in all fixed outlets	Very good	
Air tightness	Air permeability 6.7 m³/h.m² (as tested)	Good	
Secondary heating	None	N/A	
Low and zero carbon energy sources Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property: • Solar photovoltaics			
Primary energy use			
The primary energy u	se for this property per year is 90 kilowatt hou	ırs per

Potential saving

this property's energy efficiency. If you make all of the recommended changes, this will improve the property's energy rating and score from B (84) to B (86). What is an energy rating? **Recommendation 1: Solar water heating** Solar water heating Typical installation cost £4,000 - £6,000 £32 Typical yearly saving

this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property. The estimated saving is based on making all of the recommendations in how

to improve this property's energy performance.

Estimated energy used to heat this property

Heating use in this property

insulation in this property.

2725 kWh per year **Space heating Water heating** 1899 kWh per year Potential energy savings by installing insulation

The assessor did not find any opportunities to save energy by installing

You might be able to receive Renewable Heat Incentive payments. This will

help to reduce carbon emissions by replacing your existing heating system

with one that generates renewable heat. The estimated energy required for

space and water heating will form the basis of the payments.
